CVLN 181	Arab Renaissance	3(3,0)
The Arab Renaissance is studied through historical and socio-political texts.		

CVLN 190	Freshman Art History	3(3,0)
This course provides an overview of art and its development in the Western world. It covers the main art periods from “Prehistoric Art” through “Contemporary Art,” as well as the effects of the socio-political cultures of the times.		

ELEC 101	Electrical Drawing	3(3,0)
This course covers reading and interpreting electrical installation drawings and performing electrical installation, machines, and electronic circuit drawings using standard symbols. This course also covers the use of standard computer packages for electrical drawings. This course will also enable students to understand the installation of various electrical and electronic systems and wiring in buildings.		

ELEC 111	Industrial Electricity	3(3,0)
The course will introduce and cover circuit variables and elements; methods and techniques for analyzing DC and AC circuits; 3-phase systems; and power calculations. Fundamentals of industrial devices and equipment will be introduced, along with topics related to their safety.		

ELEC 121	Digital Electronics	3(3,0)
This course introduces different logic gates, develops truth tables for combinational logic circuits, covers simple Boolean expressions for logic gates, and describes the fundamental concepts of ICs.		

ELEC 122	Analog Electronics	3(3,0)
This course aims to provide a basic understanding of the principles of analog electronics and the operation of diodes, transistors, and Op Amps. This course also covers the basic design of analog amplifiers and gain stages.		

ELEC 123	Industrial Electronics	3(3,0)
This course provides a basic knowledge of circuitry for the control and conversion of electrical power with high-efficiency converters. Converters convert and regulate voltage, current, or power; examples include DC-DC converters, AC-DC rectifiers, and DC-AC inverters.		

ELEC 131	Electrical Power Generation and Distribution	3(3,0)
This course covers the principles of electrical power generation and distribution, as well as the methods used to protect electrical power systems.		

ELEC 132	Electric Machines	3(3,0)
This course covers the construction, principles of operation, characteristics, and applications of DC machines; the basic principles of transformers; and the construction, principles of operation, and applications of AC machines.		

FADR 100	Basic Drawing	3(2,2)
This course teaches students the basics of drawing with lines, shapes, tones, shadows, and colors. Still life set-ups are used to develop the student's observational skills and drawing techniques. Students experiment with various drawing media (charcoal, pencil, graphite, and ink) to develop their technical abilities and creativity.		

FADR 115	History of Art Overview	3(3,0)
This course is a comprehensive overview of artistic movements throughout the centuries, with an emphasis on the 20th century. It explores the forms, purposes, meanings, and principles of the artistic styles that influenced cultures across the globe. The course also introduces students to basic analytical tools for critically analyzing art within its cultural, political, and historical contexts.		

FADR 120	Introduction to Color Theory	3(3,0)
This course focuses on the principles, theories, and applications of additive and subtractive colors in the visual communication design process. Students investigate color schemes, color mixing, color properties, and color relationships, and examine the psychological, cultural, and symbolic aspects of color and their relation to visual communication.		

FADR 130	Basic Digital Photography	3(2,2)
This course introduces students to the basic concepts and practices of digital photography. Students learn to use the camera, lenses, and other basic photographic equipment to create professional images. It introduces students to the aesthetic principles of composition, space, exposure, light, and color. Students also acquire skills in digital manipulation and learn the technological requirements of digital formats and resolution.		

GRDS 150	Introduction to Arabic Calligraphy	3(2,2)
This course introduces students to Arabic Calligraphy, one of the highest art forms in the Arab world and a primary medium of Islamic visual expression and creativity. Students will learn about the history of Islamic Calligraphy, its origin, tools, and styles (Riqa, Naskh, Deewani, Thuluth, and Kufi). In addition, students will gain hands-on experience with basic lettering and Kufic compositions.		

GRDS 160	Principles of Advertising	3(3,0)
This course introduces the basic principles of advertising and their role in media and society. It provides an overview of the advertising industry, functions, and practices within the broader communications context. This course examines advertising agencies, advertising professionals' roles, agency-client relationships, target audiences, media, ethics, and creative and strategic thinking. A brief historical analysis of advertising is included to shed light on the important role social forces have played in its evolution.		

HIST 100	History of the Ancient World	3(3,0)
This course examines various topics, including the origins of civilization in Egypt and Mesopotamia, the civilizations of Ancient Greece and Rome, the origins and development of Judaism, and the early Christian Church. **Co-requisite**: ENGL 101.		

HIST 102	Europe from the Reformation to the French Revolution	3(3,0)
A survey of European history begins with the 16th-century Protestant Reformation and includes absolutism, the scientific revolution, the Enlightenment, the Old Regime, and the French Revolution. **Co-requisite**: ENGL 101.		

HIST 103	Europe in the 19th and 20th Centuries	3(3,0)
Topics include the Industrial Revolution; the rise of political ideologies, social classes, nationalism, and imperialism; the Russian Revolution; the two world wars; the interwar period; and the Cold War era. **Co-requisite**: ENGL 101.		

HIST 108	Issues and Themes in U.S. History: 1607-1877	3(3,0)
American history from 1607 to 1877 examines the development of the United States from early settlement through the Civil War era. Emphasis is placed on the evolution of American politics, race relations, economic and social trends, and Western expansionism. **Co-requisite**: ENGL 101.		

GEOL 160	Earth Geology	3(3,0)
This introductory course is designed to provide a general overview of some aspects of the Earth's natural environment and system. It introduces the processes and physical systems of the Earth that are important in controlling its environment. In addition, the course discusses the relationships among Earth systems and processes and their environmental effects.		

PHIL 102	Freshman Philosophy	3(3,0)
This course is an introduction to the part of philosophy concerned with questions about the ultimate nature of our world and our knowledge of it. The issues discussed include the existence and nature of God, the place of human beings in the universe, the nature of reality, human nature, human knowledge and skepticism, freedom and determinism, and the relationship between mind and body. The emphasis of the course varies from instructor to instructor. **Co-requisite**: ENGL 101.		

PHIL110	Critical Thinking	3(3,0)
This course introduces the basic rules of clear and rational thought. Students are offered an extensive analysis of examples on how to detect false reasoning, illegitimate appeals to emotions, inconsistencies, and contradictions. This course aims to develop logical awareness to the point that the rhetoric of everyday life can no longer victimize a person, and can develop arguments with clarity and confidence. **Prerequisite**: Native English speakers or English 098. **Co-requisite**: ENGL 101.		

POSC 190	Freshman Politics	3(3,0)
This survey course is recommended for students interested in discovering how politics impacts their lives and how they, in turn, can affect politics. Students are introduced to the basic concepts of Political Theory, Comparative Politics, International Relations, and Public Policy. **Co-requisite**: ENGL 101.		

PSYC 190	Freshman Psychology	3(3,0)
This course aims to develop an understanding of human psychology by focusing on the factors that influence human behavior and mental processes. It covers cognition, emotions, learning, human development, biological bases of behavior, personality, psychological disorders, psychotherapy and behavior change, and social behavior. **Co-requisite:** ENGL 101.		

PSYC 195	Freshman Stress Management	3(3,0)
This course addresses the basic principles, theories, and techniques to manage personal stress effectively. Students will better understand the mind-body relationship, learn to employ a holistic approach to stress, and adopt effective cognitive, coping, and relaxation techniques. **Co-requisite**: ENGL 101.		

SOCI 190	Freshman Sociology	3(3,0)
This course is designed to give freshman students an overview of the field and familiarize them with essential sociological concepts. It focuses on the individual in society, the study of society, social institutions, and human agency. In particular, the course will focus on how people's lived experiences are shaped by social forces and reshaped through human action. **Co-requisite**: ENGL 101.		

Academic Guidelines

Courseload:

1. Students are expected to finish the Freshman Program in two regular semesters.
2. Students can register for up to 15 credits per semester.
3. Students on probation can register for up to a maximum of 12 credits.

Transfer from Freshman Science to Arts:

Students must take BECN 190 and achieve a minimum grade of 70.

Repeating courses:

A course may not be repeated more than two times, including withdrawals.

English courses:

Students' English level upon acceptance determines the number of credits students can register for per semester, along with the English course as follows:

English level	Number of Credits
IELP 085	10
IELP 095	10
IELP 100	13

If the students' English level upon acceptance is ENGL 210, ENGL 210 replaces ENGL 101, and ENGL 210 should be replaced with a humanities elective in their degree program.

Humanities/Social Sciences Courses:

To take humanities or social sciences courses, students should consider the following:

Humanities/Social Sciences course code starting with	Co-requisite	Pre-requisite
100	ENGL 101	
200		ENGL 101
300	ENGL 210	

Joining Degree Programs

Students may join a degree-granting program at RHU after completing the freshman program if they obtain the freshman-year-to-Lebanese Baccalaureate equivalency certificate from the Equivalence Committee of the Lebanese MoEHE. Students on the Freshman Arts track may join any program offered at the College of Business Administration, or the Graphic Design Program or English Program offered at the College of Arts and Sciences. Students on the Freshman Science track are eligible to join any degree-granting program offered at the University. Additional requirements to join specific programs are summarized below.

College of Arts and Sciences:

Graphic Design Program. A GPA of at least 70 and a passing score on the RHU Graphic Design Aptitude Test.

Computer Science Program: A GPA of at least 70 and a minimum grade of 70 in MATH 190 and MATH 191.

Healthcare Information Systems Program: A GPA of at least 70 and a minimum grade of 70 in MATH 190 and MATH 191.

College of Business Administration:

Business Administration programs. A GPA of at least 70 and a grade of at least 70 in MATH 189 or MATH 190 and BECN 190.

College of Engineering:

Engineering Programs. A GPA of at least 70 and a minimum grade of 70 in MATH 190, MATH 191, PHYS 190, and PHYS 191.
