MATH 189	Fundamentals of Algebra	3(3,0)
Real number systems, radicals and rational exponents, polynomials, factoring, fractional expressions, lines in the plane, functions and their graphs, inverse functions, solving equations and inequalities, real zeros and the Fundamental Theorem of Algebra, exponential functions and their graphs, logarithmic functions and their graphs.		

B. Mandatory Courses

All College of Business Administration students must take 41 credit hours of mandatory foundational and business functional courses. Marketing and Advertising Program students take Introduction to Digital Media instead of Quantitative Methods for Business. A list of these courses and their descriptions follows.

Course	Title	Credits	Prerequisite
BACC 205	Financial Accounting	3	
BACC 255	Managerial Accounting	3	BACC 205
BADM 215	Personal Development and Management	1	
BADM 235	Business Research Methodology	1	
BADM 230	Business Law	3	
BADM 250	Business Statistics	3	
BADM 290	Community Engagement Experience	0	
BADM 420[1]	Quantitative Methods for Business	3	BADM 250 or MATH 351 or Senior Standing
BECN 301	Microeconomics	3	Junior Standing
BECN 302	Macroeconomics	3	Junior Standing
BFIN 300	Financial Management I	3	BACC 205
BITM 300	Business IT Management	3	BITM 200
BITM 350	Fundamentals of Data Analytics	3	BADM 250 or MATH 351.
BMGT 200	Introduction to Management	3	Co-req. ENGL 210.
BMKA 200	Introduction to Marketing	3	Co-req.: ENGL 210
MATH 207[2]	College Algebra	3	Placement

[1] Students in the Marketing and Advertising program take GRDS 220 – Introduction to Digital Media instead of BADM 420- Quantitative Methods for Business

[2] Students who do not pass the Mathematics Placement Test must take MATH 207. Students who pass the test take a free elective instead of MATH 207.

Descriptions of these courses are given below.

BACC 205	Financial Accounting	3(3,0)

This course introduces the basic concepts and principles of financial accounting. It covers major areas of financial accounting: generally accepted accounting principles, the accounting cycle, financial reporting, and the accrual basis of accounting. It provides the necessary understanding of basic accounting principles and procedures for recording the financial assets, inventories, noncurrent assets, liabilities, and owner's equity.

BACC 255	Managerial Accounting	3(3,0)
This course introduces students to the basic concepts, analyses, uses, and procedures of management accounting. It would enable students to understand and view cost as part of activities planned and implemented by a company. It aims to develop managerial decision-making skills by covering the following topics: cost categories, cost-volume-profit analysis, master and flexible budgets, direct costs, and manufacturing overhead variances and relevant costs. **Prerequisite**: BACC 205.		

BADM 215	Personal Development and Management	1(1,0)
This course engages the student in self-reflection, self-discovery activities, and lectures. It is intended to encourage students to develop themselves and plan for the present and the future by becoming more self-aware. Topics and issues include personality types, communication styles, personal performance factors, career choices, and personal development planning.		

BADM 230	Business Law	3(3,0)
This course introduces the legal framework of business, emphasizing Lebanese law governing business conduct. Topics include legal concepts, sources of law, types and classes of contracts, legal forms of business organizations, the commercial code, and labor issues.		

BADM 235	Business Research Methodology	1(1,0)
This course exposes students to business research methodology and the steps for systematically solving a business problem or addressing a market opportunity. The course's main topics include problem definition, research design and methodology, data collection, and sampling techniques. The course concludes with students writing a research proposal.		

BADM 250	Business Statistics	3(3,0)
Business Statistics introduces students to the fundamentals of applied statistics. Accordingly, students are exposed to statistics as they are directly applied in solving business problems. The course will cover random variables, sampling, probability distributions, expectation, hypothesis testing and confidence intervals, analysis of variance, correlation, and simple linear regression.		

BADM 290	Community Engagement Experience	0(0,1)
The Community Engagement experience consists of a specific number of volunteer hours by students at community organizations under the supervision of a faculty		

member. Community organizations may include governmental agencies, non-governmental organizations, and civil society organizations.

BADM 420	Quantitative Methods for Business	3(3,0)
This course introduces students to managerial decision analysis using quantitative tools. The course will introduce students to the use and development of mathematical models to help managers make informed decisions. The focus is on the applied aspects of statistics and math. As such, the course will cover the basics of probabilistic and statistical techniques, decision analysis, linear programming, optimization, forecasting, and waiting-line theory. **Prerequisite:** BADM 250, MATH 351, or Senior Standing.		

BECN 301	Microeconomics	3(3,0)
Students will study the general principles of microeconomics. Included are the theoretical constructs of consumer behavior, cost structure, and the operations of business firms in the market economy under conditions of perfect competition, oligopoly, monopoly, and monopolistic competition. **Prerequisite**: Junior Standing.		

BECN 302	Macroeconomics	3(3,0)
Students will study the general principles of macroeconomics. This course presents the formal Keynesian theory of income determination and its contemporary critiques, including the possible causes and solutions to unemployment and inflation, as well as the importance of the international economy. Government fiscal and monetary policies are examined in detail. **Prerequisite:** Junior Standing.		

BFIN 300	Financial Management I	3(3,0)
This course will expose students to the foundational principles, theories, and applications of corporate and business finance and financial management. It covers simple and compound interest, risk and rates of return, the time value of money, stock and bond valuations, discounted cash flow analysis, and financial ratios. **Prerequisite:** BACC 205.		

BITM 300	Business IT Management	3(3,0)
This course provides a comprehensive introduction to information systems and their application. It explains how to use and manage information technology to revitalize business processes, conduct e-commerce, improve business decision-making, and gain a competitive advantage. **Prerequisite:** BITM 200		

BITM 350	Fundamentals of Data Analytics	3(3,0)
This course introduces students to statistical techniques for analyzing large datasets. The course covers the theory and application of both parametric and nonparametric methods. Students will learn to visualize the data using univariate and bivariate plots, factor analysis, and cluster analysis to investigate whether correlations exist in a multidimensional space and to build and test predictive models such as linear, logistic, and time-series models. **Prerequisite:** BADM 250 or MATH 351.		

BMGT 200	Introduction to Management	3(3,0)
Students study the basic functions of management and are exposed to modern management practices, current events, problem-solving, and ethical dilemmas. Topics include decision-making, strategic and operational planning, organizational structure, Human Resources management, leadership, and control techniques. The instructor facilitates discussion and integrates these topics through contemporary business issues and case studies. **Co-requisite**: ENGL 210.		

BMKA 200	Introduction to Marketing	3(3,0)
This course introduces the basic principles, theories, and marketing practices in our modern, ever-changing business environment. The course covers the marketing process activities of creating value for customers and capturing value from customers in return. It also discusses the marketing mix and how to build long-term customer relationships. Students will analyze case studies about a “real-life” product or service. Videos and in-class discussions on current marketing topics will assist in the learning experience. **Co-requisite**.: ENGL 210		

GRDS 220	Introduction to Digital Media	3(3,0)
In this course, students will develop a solid foundation in the tools and techniques of Adobe Illustrator and Adobe Photoshop. Students will learn the difference between vector-based and pixel-based programs and how to integrate both work fields to produce creative graphics. Moreover, students will receive a brief introduction to Adobe InDesign, including its workspace, functions, and tools.		

MATH 207	College Algebra	3(3,0)
Solving linear and non-linear equations, modeling with equations, functions, and their graphs, increasing and decreasing functions-transformation, quadratic functions and minima, modeling with functions, combining functions, polynomial functions and their graphs, dividing polynomials, real zeros of polynomials, complex numbers, complex zeros of polynomials, exponential and logarithmic functions, sequences and summation notation-arithmetic sequences, counting and probability.		

Program Requirements

Requirements for the Bachelor of Business Administration degree are program-specific. They encompass two categories: Major and non-major. Each category consists of mandatory and elective courses. The program requirements for the Bachelor of Business Administration degree in the different business majors are given below. Details and titles of relevant courses are included in the Student’s Study Plan (SSP), which every business student will have.

Course Coding

Each course offered by the College of Business Administration is designated by a four-letter code representing the college and program, followed by a three-digit number denoting the course number, "**BABC xyz**." The letter **"B"** refers to the College of Business Administration, and "**ABC**" refers to the program as follows:

ACC: Accounting
ADM: General Business Administration
ECN Economics
FIN: Finance
HRM: Human Resources Management
ITM: Information Technology Management
MGT: Management
MKA: Marketing and Advertising

The three-digit number "**xyz**," between 200 and 599, denotes the course number. The first digit indicates the course level: **1** for freshman, **2** for sophomore, **3** for junior, **4** for senior, and **5** for graduate.

The following example demonstrates the coding system: BMKA 200 is a sophomore-level marketing course in the College of Business Administration.

The designation used to represent the credit-hour breakdown **c (t, p)** of a course is as follows: **"c"** is the total credit hours**, "t"** stands for the theoretical component of the course, and **"p"** is the practical or laboratory component. For example, 3(3, 0) denotes a 3-credit course with 3 contact lecture hours and 0 laboratory hours.

Learning Support Center

The Learning Support Center (LSC) at the College of Business Administration is another manifestation of RHU's unwavering commitment to students' academic success. The LSC offers the students a peer-to-peer learning environment that complements classroom learning. The Center aims to support students in advancing their knowledge and skills, reinforcing what they learn in the classroom, or overcoming learning and performance difficulties. In addition to being a focal point for inquiry and two-way "questioner-replier" learning, the LSC provides space for academic interactions that can significantly enhance learning.

The Center is in room H 101 and is open to all students throughout the week. The LSC is staffed by carefully selected Teaching Assistants, who are graduate students and upper-level undergraduates. Teaching Assistants are always available and ready to assist their fellow students in overcoming their academic challenges. Additionally, an "on-call" faculty member is assigned to ensure that the LSC acts in the best interests of students and to intervene when necessary to help them.

The Center's resources include books, study guides, course materials, boards, computers, videos, DVDs, documentaries, and other learning tools.
